More Materials from IQOS 3 MRTP Application Posted, Comment Deadline Extended

FDA recently received a request to extend the comment period on Philip Morris Products S.A.'s (PMPSA) modified risk tobacco product (MRTP) application for the IQOS 3 System Holder & Charger to provide time for the public to review application materials that were not previously posted.

FDA has decided to grant the request and, in accordance with applicable laws, will make these materials publicly available on the [application webpage](#) after the materials are redacted. Public comments on these materials should be submitted to [FDA-2021-N-0408-0001](#). At this time, there is no deadline for public comments.

Please [sign up to receive email alerts](#) when materials from any MRTP application under scientific review have been posted or check our PMPSA MRTP application webpage regularly for updates specific to those application.
